What quality do you need for the occasion?

As always, Duni has a large variety of choices of products to make your operation run smoothly and efficiently. Depending on the event, you will need different levels of quality and different properties for different occasions. We ask you to please familiarise yourself with our labelling system depicted on these pages.

Duni Materials

Here is a quick view of the high-quality, highly functional materials we use in our Eating & Drinking Range.

(PS) Polystyrene

-4 °C to +70 °C/80 °C

Duni's most frequently used plastic. This clear or coloured stiff plastic has a flawless finish that makes it the number one choice for food and drink presentation.

(EPS) Expandable polystyrene

-4 °C to +80 °C

EPS is essentially air-filled polystyrene for additional lightness. It's a soft, white plastic with insulating properties making it ideal for more low-price outlets that serve hot and cold drinks.

(CPLA) Crystallized Polylactid acid

0 °C to +80 °C

CPLA is a bio-polymer made of natural and renewable resources, such as cornstarch. Unlike many other biopolymers, CPLA is heat resistant up to 80 degrees, making it excellent for hot cup lids and cutlery. Depending on the thickness of the product, CPLA products may also be compostable, for example the hot cup lids.

(PLA) Polylactic acid

0 °C to +40 °C

Duni cold drink cups and lids and some of our Duni ecoecho™ range salad bowls, deli food containers and dressing cups are manufactured using PLA (polylactide), a plastic made using 100% renewable materials, such as cornstarch. PLA is crystal clear and presents fresh food in its very best light.

(PBS) Polybutylene succinate

0 °C to +90 °C

One of the most advanced biopolymers. It has superior barrier and properties like normal plastics, but it is compostable.

(PP) Polypropylene

-20 °C to +120 °C

A tough material, hard to tear. Ideal for outside use such as festivals as the material does not splinter or leave any sharp edges if crushed.

Quality

When you choose Duni, you are choosing high-quality products. To make it easier for you to decide what quality best meets your needs, we have placed our products into 3 quality categories using the star system (see below). Look for the quality level tag to guide you through the assortment.

When only the best will do.
Durable and beautiful.

The fine balance between good looks and good value for money.

The big winner when it comes to large events and price is an important factor.

Our symbols

These symbols will provide you with an instant idea as to the products' practical benefits.

Product can be heated in a microwave oven.

Product provides excellent insulation, keeping drinks hot or cold longer.

Clean and hygienic

Our Coffee to Go cups are incredibly convenient. They are part of the Duni ecoecho™ range, which makes them very ecologically friendly.

The earth in mind: Duni ecoecho™

In our ecoecho™ range, we use innovative, state-of-the-art materials, which are either compostable (biodegradable) or recycled to achieve our goal of sustainability, environmental friendliness and reduce our CO₂ footprint. Duni ecoecho™ – meeting today's challenges with tomorrow's solutions.
